TASHKENT LABORATORY WANTS DIRECTOR;  
CHEMICAL ARTEL GETS NEW PRESIDENT

INSTITUTE NEEDS MICROBIOLOGIST, SURGEONS -- Tashkent, Pravda Vostoka, 26 Aug 50

The Scientific Research Institute of Orthopedics, Traumatology, and Prosthetics, Tashkent, announces a competitive examination for filling the vacant post of director of the microbiology laboratory. The institute is located at Ulitsa Kablukova, 9, and its telephone number is 31-406.

There is also a competitive examination in clinical surgery. In orthopedics there are six positions; in restorative surgery, two; in neurosurgery and face and jaw surgery, one.

The examination will be open for one month -- Advertisement

PRODUCTION PLANS FAIL -- Yerevan, Kommunist, 23 Aug 50

The president of the Yerevan Chemical Artel reported at a recent meeting on the failure to fulfill production plans in gross output and types of items. Measures were planned to correct the deficiencies, a new set of regulations was adopted, and a new president and staff were elected.

The 6-month plan in gross production was only 85.9 percent fulfilled. Instead of the 14 types of output anticipated in the plan, only 5 are being produced. High-quality output is not sufficiently emphasized. Training and discipline are unsatisfactory, and there is not enough Communist influence on labor. During a 6-month period, only two lectures were given for the artel.

Following this report, the supervisor of technical work discussed the failure of the artel to save raw material, and to utilize good suggestions made by the workers. Those who make such suggestions are not rewarded, although the state has made ample provision for this.
